

## CHEM 191 - Hello!

1. Introduce yourself to the person sitting next to you.
2. Ask your neighbor:
  - Where they're from:
  - What their major is (if they have one):
  - How then ended up in CHEM 191:
  - What you both have in common:
3. With your neighbor, come up with 3 questions you have about this class and/or college in general. These could be details like "How will work be graded in this class?" or "What happens if I miss a day of class?" or broad things like "What will I learn in this class?". You can use the questions here, but try to come up with at least two original questions.

1.

2.

3.
